

Change mobile phone used for 2-Factor Authentication

Install and pair new phone

Do you want to set up 2-Factor Authentication on a new mobile phone? That's possible!

Step 1

Log in to MijnCN. 

Step 2

Navigate to *'Account'*.

Step 3

Click on the *'Change or add linked device'* link in the *'Account settings'* block.

Step 4

Now enter your password.
Start the MijnCN 2-Factor app on your old phone.
Enter the code shown in the app.
Click on *'Next'*.

Step 5

Now scan the QR code on the screen with your new phone.

Step 6

Now enter the code shown in the MijnCN 2-Factor app on your new phone/tablet. Now click on *'Complete'*.

Step 7

We recommend that you also download a list of backup codes again to ensure you can always log in. You can use these codes if you're unable to log in with the codes in the app or if you don't have your mobile phone with you. To do this, click on *'Click here to download the backup code list'* in the following window.
